IDEATION PHASE – DEFINE THE PROBLEM STATEMENTS

Indoor Gardening Services Management (IGSM)

Project Name	Indoor Gardening Services Management (IGSM)
Project Type	Individual Project

Purpose

The purpose of this stage is to define the problem from the customer's perspective. The problem statements focus on the challenges faced by indoor plant owners while maintaining their plants and managing gardening service requirements.

Previously Identified Problem

The following problem was identified during the brainstorming and idea prioritization stage:

> *"Indoor plant owners need a simple and organized way to request and manage gardening maintenance services because regular plant care can be difficult to manage along with their daily activities."*

Problem Statement 1	
I am (Customer)	An indoor plant owner
I'm trying to	Keep my indoor plants properly maintained and healthy.
But	It can be difficult to manage regular gardening activities consistently.
Because	Different plants require regular care such as watering, pruning, and fertilizing, while I also have other daily responsibilities.
Which makes me feel	Concerned that my plants may not receive proper and timely maintenance.

Problem Statement 2	
I am (Customer)	An indoor plant owner
I'm trying to	Request the gardening service that my plants need.
But	Managing and coordinating different gardening service requirements can be inconvenient.
Because	I may need different services at different times and need an organized way to manage those requests.
Which makes me feel	Frustrated when arranging and managing plant-care services becomes difficult.

Problem Statement 3	
I am (Customer)	An indoor plant owner
I'm trying to	Keep track of the progress of my requested gardening service.
But	It can be difficult to know whether a service request has been assigned, is being handled, or has been completed.
Because	Without an organized service-management process, tracking the request manually can be inconvenient.
Which makes me feel	Uncertain about the status of my gardening service request.

Common Customer Need Identified

These problem statements indicate a common customer need for a simple and organized way to request, manage, and track indoor gardening services.

Final Defined Problem

Indoor plant owners need a simple and organized way to request, manage, and track gardening maintenance services because regular plant care and service coordination can be difficult to manage along with their daily activities.
