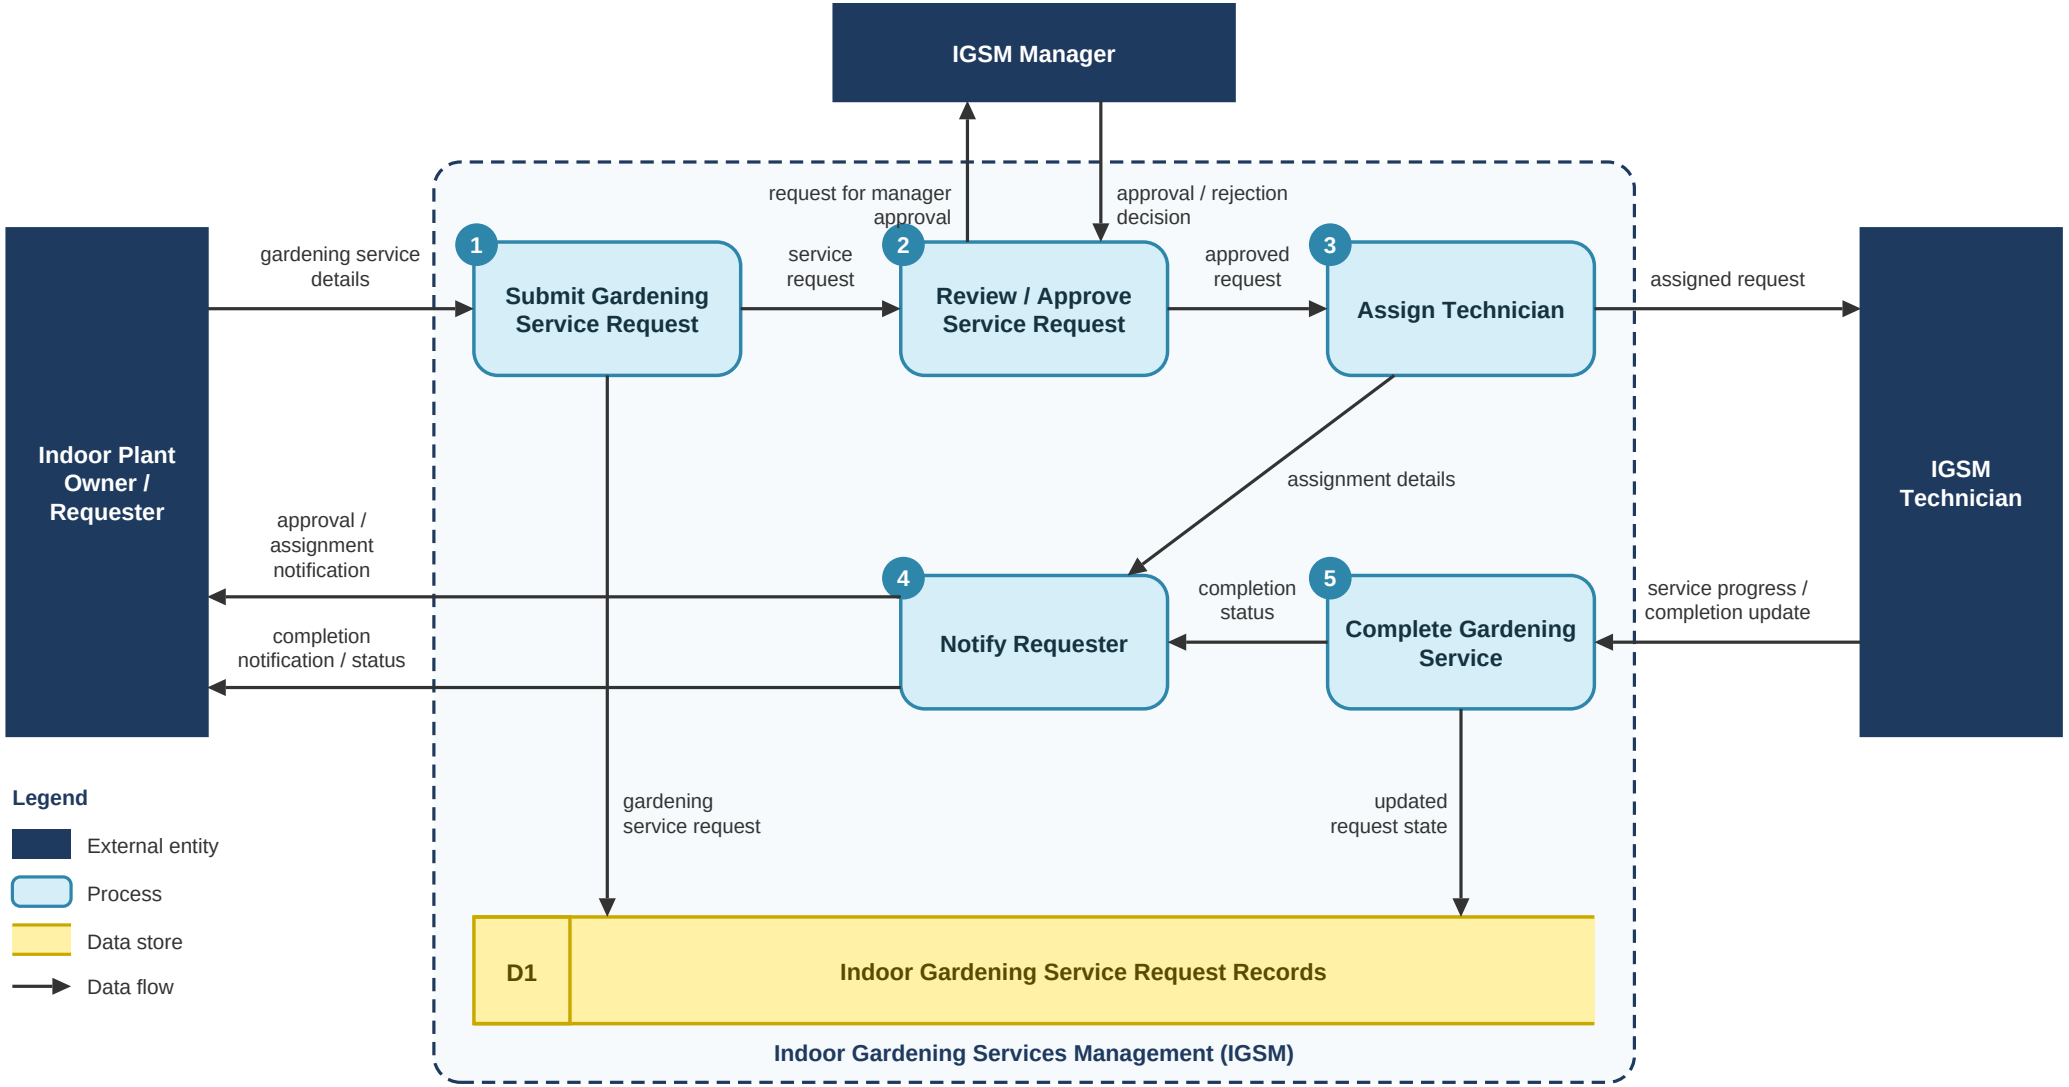
PROJECT DESIGN PHASE-II

DATA FLOW DIAGRAM & USER STORIES

Project Name	Indoor Gardening Services Management (IGSM)	Project Type	Individual Project	Maximum Marks	4 Marks

Data Flow Diagram: A Data Flow Diagram (DFD) shows how data enters and leaves a system, what changes the information, and where data is stored. This DFD shows how a gardening service request moves through the IGSM system, from submission to approval, technician assignment, notifications, and completion.



Data Flow Diagram for Indoor Gardening Services Management (IGSM)

User Stories

The following user stories describe the functional requirements of the Indoor Gardening Services Management (IGSM) system for the Indoor Plant Owner / Requester, the IGSM Manager, and the IGSM Technician.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Indoor Plant Owner / Requester	**Gardening Service Request**	USN-1	As an indoor plant owner, I can submit a gardening service request by providing the required service and plant details.	The request is successfully created with the required details and a request number is generated.	High	Release-1
		USN-2	As an indoor plant owner, I can select the gardening service required for my plants.	I can select an available service such as Watering, Pruning, or Fertilizing.	High	Release-1
		USN-3	As an indoor plant owner, I can provide the plant type, priority, description, and preferred date for the requested service.	The submitted request stores the provided information correctly.	High	Release-1
IGSM Manager	**Service Request Approval**	USN-4	As an IGSM Manager, I can review a submitted gardening service request.	The manager can view the request details and make an approval decision.	High	Release-1
		USN-5	As an IGSM Manager, I can approve or reject a gardening service request.	An approved request proceeds to technician assignment and a rejected request is marked as Rejected.	High	Release-1

User Stories (continued)

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
IGSM Technician	**Technician Assignment and Service Completion**	USN-6	As an IGSM Technician, I can view gardening service requests assigned to the technician group.	The technician can access the relevant assigned request details.	High	Release-1
		USN-7	As an IGSM Technician, I can update the gardening service request when the requested service is completed.	The request state is updated to Completed after the service is finished.	High	Release-1
Indoor Plant Owner / Requester	**Request Tracking and Notifications**	USN-8	As an indoor plant owner, I can receive notifications about important changes to my gardening service request.	The requester receives the appropriate notification when the request is approved and assigned.	High	Release-1
		USN-9	As an indoor plant owner, I can track the state of my gardening service request.	The request state reflects the current stage of the service request, such as New, Assigned, Rejected, or Completed.	High	Release-1
	Service Request Management	USN-10	As an indoor plant owner, I can request different gardening maintenance services based on my plant-care needs.	I can create a request for available gardening services such as Watering, Pruning, or Fertilizing.	Medium	Release-1
